OASIS

Premium SaniModule

Lark SaniModule

The multifunctional SaniModule is ideal for a camping park or free-standing city toilets. Use of a high quality waterproof materials will allow you to enjoy the properties of such a perfect solution for a long time.

Facade

Extremely durable and resistant to changing weather conditions material, doesn't require regular maintenance, doesn't fade and doesn't change shape under the influence of sunlight and temperature.

A collection of claddings with an elegant, deep texture of real wood. It's a combination of a natural, authentic look with unmatched durability.

grey

anthracite

Pest resistant

Easy to clean

Windproofness

Moisture resistant

Impact resistant

No painting and maintenance required

Lightness that facilitates installation and does not load the structure

Warranty

Ventilation of the facade

Easy to clean, thanks to the mill grinder, which allows free water drainage

LARK
SaniModule

Roof

Polycarbonate plates are ideal for all types of roofing. Very resistant to impacts (they are almost 200 times more resistant than glass) and have a high coefficient of light transmission, which provides the opportunity to light the room.

- High resistance to mechanical damage and external loads
- Elasticity and flexibility
- High light transmission
- Lightness

LARK SaniModule

Doors

Metal entrance doors with a porthole and satinglass have increased resistance to moisture.

LARK SaniModule

Boiler room

The Ariston electric water heater is a smart device with a double water tank.

ANTI-LEGIONELLA FUNCTION
Once a month, the water temperature rises automatically above 65 ℃ to eliminate bacteria and ensure water hygiene.

ANTI-FRAUD SYSTEM
It protects the device against a temperature drop below 5 ℃.

SELF-DIAGNOSIS
In the event of a fault, an error code is displayed on the display to easily identify the cause.

PROTECTION AGAINST STARTING "DRY"
In the event of a leak or lack of water in the device, it turns off the heater to prevent it from burning out.

THE FUNCTION OF ACTIVE ELECTRICAL PROTECTION
After finishing the heating process, the heater is completely disconnected from the power supply to guarantee maximum safety.

SMART touch panel BLUE-TECH
An inteligent and intuitive display for easy temperature management with information on water preparation for the first shower.

Accessories

Walls and floor

The walls and floor are made of high quality, waterproof HPL board, which thanks to its properties will allow a long time to maintain a fresh and new look of SaniModule Lark interior. In addition, covering the floor with a non-slip layer will take care of the maximum safety of users.

- resistant to abrasion
- impact resistant
- hygienic
- resistant to scratches
- antibacterial
- resistant to high temperature

HPL boards are very easy to keep clean. As a rule wiping them with a soft cloth and warm water is enough . If necessary, cleaners can be used.

KOŁO

Permanent beauty bath ceramics

The one-piece monolithic shower cabin, made from the highest quality material, thanks to the integration of the walls with the shower tray, ensures excellent protection against leakage.

A wall-hung toilet and a countertop washbasin are elements of bathroom ceramics emphasizing high standard and unique style.

Bathroom fan

Additional accessories

Hair dryer

Hanger for toilet paper

Towel radiator

Movable mirror

About us

For many years, we have been a leading producer of high-quality mobile homes in timber-framed technology. Due to the high quality of the products we offer, we have become the main importer of mobile homes to the central and western Europe. At this moment, the Mobile Homes Factory Lark Leisure Homes supplies hundreds of campsites and learn about their needs and requirements.

This is why the idea for the production of sanitary modules appeared, which will in no doubt adapt to the high standards of campsites and the expectations of the clients of tourist facilities across Europe.
